The philanthropic Mr. Russell Sage has expressed his views on the question of rapid transit, and it is pleasant to learn that his preference of elevated over underground roads is based on sani-

tary considerations alone. "Think of an underground tunnel." says Mr. Sage, "the gas pipes and sewers and water mains! See how unhealthy it is, how unwholesome and offensive to the sense of smell!"

Then he turns to the sanitary advan

Mr. Thomas F. Ryan, of the Metropol itan Traction Company, on the other hand, announces that the Company favors rapid transit. He makes the argument that an underground road would aid the work of the cable roads in rapidly increasing the growth of the uptown districts, and the cable roads would continue to be a necessity just as the surface roads now remain a scessity despite the elevated system. This is a sensible view of the case. The underground tunnel ought to be and we believe will be constructed.
